WELLNESS VISIT OVERVIEW

**Would you like to discover more about your body in a
non-invasive way?**

**Food sensitivities, toxins in our environment,
are you taking the right supplements?
Not losing weight?**

YOU CAN BE WELL !

Western medicine's general approach is to suppress symptoms.
Our Wellness Evaluation is intended to improve and support the
proper function of your body. Our approach is to encourage healing
by having the proper building blocks of nutrition in place.

Nutritional Response Testing (NRT). (A method of applied kinesiology) is the study
of different points on the body surface as they relate to our body systems.
Your results reflect the overall state of health and the flow of vibrational energy
to every organ and function of the body. The tests are accurate and often give
information not found through traditional medical testing procedures.

(Your current conditions and previous tests are considered in the evaluation process)

Your individual exam findings will then be supported through nutritional therapeutic
supplements which have been formulated to support, detoxify and rebuild body functions.

**COST: Initial Wellness Visit \$75.00-existing chiropractic patients
 \$100.00 new to the office**

Follow-up Visits \$30.00 or buy multiple visits and save.

AFTER YOUR INITIAL WELLNESS EVALUATION

Healing takes time. We work with you closely and regularly. The current state of your
body has taken a lifetime. The accumulated stress from possible digestive imbalances,
hormonal shifts, toxins etc. must be balanced. To be corrective the cells must renew which
can take 3-6 months.

Also, take advantage of our FOOT DETOXIFICATION BATH—see front desk for details
